Is there a guarantee that your paper will be plagiarism-free?

We have a zero tolerance policy on plagiarism. That means that every paper we produce is completely original and never has been published before. We guarantee that all the papers we produce are 100% plagiarism-free. In order to do so, we have a variety of methods to prevent plagiarism from happening. First of all, we have a plagiarism detection software that is always running on our website. It scans papers for plagiarism and notifies our employees of the results. In case a paper turns out to be plagiarized, our writers are punished and repeat offenders are even banned from working for us. Our employees go through a lot of training and have to take a test to be hired. After that, they have to go through a series of tests to prove that they can write a high-quality paper. We have special software to check the quality of their writing. We have a set of guidelines our writers have to follow. In order to ensure that our papers are plagiarism-free, we have a team of editors that goes through every paper that is being written to pick up any possible plagiarism. We have a team of over 100 editors to ensure that every paper has been checked at least twice.
